Excellent workshop! The speed of transaction settlement on Hydra head is impressive.

Well-structured content, especially the dispute resolution walkthrough.

Loved the CLI walkthrough and automated docker deployment scripts.

Loved the architecture breakdown and Docker compose demo.

Very helpful session for developers building on Hydra.

Great hands-on demonstration of fast_sync and head lifecycle!

Everything was well prepared. Kudos to the Hydra team!

Documentation was easy to follow along during the live lab.

Very clear explanation of state channels and micro-PaaS architecture.

Clear audio and great slides.

Good pacing and very informative Q&A at the end.

The live demo was super smooth and easy to follow.

Pacing was too fast during the smart contract section, was hard to follow live.

A follow-up session on production autoscaler configuration would be great.

Audio quality was inconsistent during the live Q&A segment.

Clear and concise presentation. Looking forward to more deep-dive sessions.

Great session overall! The interactive components were very engaging.

Could provide pre-requisite docker images beforehand to save setup time.

Would appreciate more time allocated for the troubleshooting section.

More detailed architecture diagrams in the slide deck would be helpful.

Fast sync demonstration was eye-opening. Great job!
